April, I see from your inspection report that you have issued a NOV on the Sage Canyon pond. I have not actually received the NOV. But would like to appeal the facts of the violation. We insist that the pond is constructed as required by our NOI, although it is much larger than the one shown on the drawing, it seemed April was distracted from the reality of the pond by equipment that was parked in the containment area. I also showed her a secondary containment pond that is to be used as backup to the main pond that she contends is not there. So in every way we have provided protective storm water containment that goes above and beyond what we committed to in the NOI. Please schedule an appeal hearing at your earliest convenience. Brent Sumsion
